

SCR4-7.5 APM

PREMIUM EFFICIENCY SCREW AIR COMPRESSOR

1

The very latest small power screw compressor, available from 4HP to 7.5HP. Giving the same energy efficiency performance as the larger APM machines in a smaller frame and featuring an IE4 variable speed permanent magnet, direct drive motor.

2

Compact dimensions with a low component count not only increases reliability but also reduces maintenance costs.

3

Innovative design with a sealed back panel means it can be installed against a rear wall when space is at a premium. Full access for servicing via front and side panels giving flexible installation options.

4

The new APM machines also feature an innovative external status LED light giving a clear indication of the compressors operating status from a distance, along with an intuitive 7" colour touchscreen controller.

5

Ideal machine for users looking to move away from piston machines to a quieter, energy efficient screw compressor.

6

Perfectly suited to small scale industrial applications that require a constant air supply for long periods.

SHANGHAI SCREW COMPRESSOR CO., LTD.

SCR4-7.5 APM

PREMIUM EFFICIENCY SCREW AIR COMPRESSOR

Brand new encapsulated airend further reduces the component count by removing the need for an additional oil tank. The airend design features an intelligent oil cooling path by only passing the highest temperature oil through the cooler, reducing power and extending the life of the airend.

Model	KW	HP	Capacity (m ³ /min)	Pressure (BAR)	Dimension (mm)	Weight (KG)	Size
